Presentation: Morgan Knechtle, CDFW; presented a very interesting PowerPoint and discussion on the Status of Adult Chinook and Coho Salmon in the Shasta River. He presented information on the three coho cohort returns; cohort 1- 48, cohort 2- 37 and cohort 3- 53. He stated that there is intrinsic potential for spawning and that small improvements can make a difference. He urged the SVRCD to keep doing the good work. Coho and Chinook returns may be impacted by dam removal. Moving the hatchery to Fall Creek, more natural flows and sediment regimes and the possible reduction of the endemic *C. shasta* infection area near Beaver Creek are all of keen interest to our local and regional fisheries communities.
