DESCRIPTION OF WORK: This Klamath River Community Fire Restoration Project will reduce hazardous fuels and restore forest in the burn scar of the McKinney Fire. The Klamath River Community Fire Restoration project occurs in the Klamath River Community along Highway 96. Treatments will focus on the removal of dead/dying hardwood and conifers along the road and adjacent to structures. Treatments will include hand removal of hazardous vegetation and dead trees. Mechanical operations will include the use of a chipper equipment and/or a masticator if applicable. Cut material will be chipped on site, chips will be kept out of meadows and riparian areas. Manual treatments will include chainsaws, loppers and pruners. Piling and burning will be limited to areas where chipping is not feasible. The project goals include community protection, forest health and resilience, and wildlife habitat maintenance.

Contractors may bid on all items listed or only a portion of the project.
